02 Workload Migration

Don't let the complexity of cloud migration prevent you from taking advantage of the benefits that the cloud transformation journey has to offer. At First Horizon we have a dedicated team of specialists that will assist you with the assessment, planning, and migration of your workloads to AWS utilizing the relevant AWS migration services. Upon a successful migration, we will conduct a well architected review to identify, and assist you to remediate any high risk Items.

MIGRATE
Workload Migration

- Retire
- Retain / Revisit
- Re-purchase
- Re-platform
- Re-host
- Re-factor / Re-architect

REVIEW
Migration Review

- Operational excellence
- Cost optimization
- Reliability
- Performance
- Security

OPTIMIZE
Cloud Optimization

- Total cost of ownership analysis
- Cost reduction
- Resource utilization
- Improved security posture
- Usage governance

PLAN
Migration Planning

- Evaluating workloads earmarked for migration
- Designing infrastructure to best suit your requirements
- Designing highly available fault-tolerant and secure cloud solutions
- We have a variety of connectivity options to best suit your needs

MONITOR
Proactive Monitoring

We offer various monitoring solutions to effectively manage and monitor your workloads. It ranges from fully outsourced remote management services, Security incident and event management, or assisting with the implementation of products of your own choice.

ASSESS
Migration Assessment

We will conduct a free cloud readiness assessment to identify workloads that should or could be migrated to the cloud.

SUPPORT
Technical Support

- Billing solutions
- Cloud disaster recovery solutions
- Backup and archiving solutions
- Technical support
- Architecting services
